JERRELL BOONE
SOFTWARE ENGINEER

EXPERIENCE

Software Engineer IraLogix, Inc - Hollywood, FL
09/2021 - Present

- Architected and deployed scalable microservices using Java and Spring Boot, resulting in a 60% reduction in dividends processing time.
- Spearheaded the implementation of a one-click tenant provisioning system, streamlining client onboarding and reducing setup time from one week to just two days.
- Led a comprehensive front-end UI redesign using Angular, ensuring compliance with modern accessibility and UX standards.
- Collaborated in an Agile environment, participating in sprint planning, code reviews, and continuous integration/deployment practices.

Software Developer HireQuest, Inc - US
05/2020 - 09/2021

- Developed a streamlined employee onboarding portal, significantly improving user experience and onboarding speed.
- Maintained and enhanced enterprise-grade business software in collaboration with QA, product managers, and stakeholders.
- Participated in code optimization, bug fixing, and documentation, contributing to overall software stability and performance.

Web Developer National Auto Lenders - US
10/2018 - 05/2020

- Designed and implemented a web-based electronic fax processing system, cutting underwriting turnaround time by 30%.
- Replaced costly third-party email signature management software with a custom in-house solution, saving the company $3,000 annually.
- Employed C#, VB.NET, MSSQL, and Git to support full-stack development and deployment.

EDUCATION

Bachelor of Science: Information Technology
Florida International University - Miami, FL, 08/2013
